

# Resume Analysis Report

Date: May 09, 2025

Target Position: Software Engineer

---

## 1. Summary

- **Overall Score:** 41.25/100
- **Semantic Alignment:** 28.74% (contextual match with job requirements)
- **Keyword Match:** 60.0% (9/15)

## 2. Keywords

- **Job-Relevant Keywords:** agile, aws, azure, c++, docker, gcp, git, java, javascript, kubernetes, microservices, python, rest apis, scrum, sql
- **Matched:** azure, docker, javascript, kubernetes, microservices, python, rest apis, scrum, sql
- **Missing:** agile, aws, c++, gcp, git, java

## 3. Skills Detected

- **Resume Skills:** python, r, sql, tableau

## 4. Skillsets Needed and Recommendations

- **Missing Skills:** agile, aws, c++, gcp, git, java
  - **Recommendations:** The resume lacks Java and cloud experience (AWS/Azure/GCP). To address this, build a personal project using Java and a cloud platform, deploying it via Docker and/or Kubernetes. Consider obtaining a relevant AWS or Azure certification to demonstrate cloud proficiency. Finally, update the resume to clearly showcase these new skills and project experience.
