

Resume Analysis Report

Date: May 09, 2025

Target Position: Software Engineer

1. Summary

- **Overall Score:** 49.96/100
- **Semantic Alignment:** 34.38% (contextual match with job requirements)
- **Keyword Match:** 73.33% (11/15)

2. Keywords

- **Job-Relevant Keywords:** agile, aws, azure, c++, docker, gcp, git, java, javascript, kubernetes, problem-solving, python, rest apis, scrum, sql
- **Matched:** azure, c++, docker, gcp, javascript, kubernetes, problem-solving, python, rest apis, scrum, sql
- **Missing:** agile, aws, git, java

3. Skills Detected

- **Resume Skills:** c, css, cybersecurity, html, mongodb, python, r, sql, tableau

4. Skillsets Needed and Recommendations

- **Missing Skills:** agile, aws, git, java
 - **Recommendations:** The resume lacks demonstrable experience with AWS and Agile methodologies. To address this, complete an AWS Certified Cloud Practitioner certification and contribute to an open-source project utilizing Agile principles (e.g., Scrum). Document these achievements on your resume, highlighting specific tasks and technologies used.
