

Resume Analysis Report

Date: May 09, 2025

Target Position: Software Engineer

1. Summary

- **Overall Score:** 41.25/100
- **Semantic Alignment:** 28.74% (contextual match with job requirements)
- **Keyword Match:** 60.0% (9/15)

2. Keywords

- **Job-Relevant Keywords:** agile, aws, azure, c++, docker, gcp, git, java, javascript, kubernetes, problem-solving, python, rest apis, scrum, sql
- **Matched:** azure, docker, javascript, kubernetes, problem-solving, python, rest apis, scrum, sql
- **Missing:** agile, aws, c++, gcp, git, java

3. Skills Detected

- **Resume Skills:** python, r, sql, tableau

4. Skillsets Needed and Recommendations

- **Missing Skills:** agile, aws, c++, gcp, git, java
 - **Recommendations:** The resume appears to lack Java and cloud experience (AWS, Azure, or GCP). To address this, build a Java-based project showcasing a relevant skill (e.g., REST API development) and deploy it to a cloud platform like AWS. Consider obtaining a relevant AWS certification (e.g., AWS Certified Cloud Practitioner) to demonstrate cloud proficiency. Update the resume to highlight these accomplishments.
