

Resume Analysis Report

Date: May 09, 2025

Target Position: Software Engineer

1. Summary

- **Overall Score:** 45.96/100
- **Semantic Alignment:** 32.15% (contextual match with job requirements)
- **Keyword Match:** 66.67% (10/15)

2. Keywords

- **Job-Relevant Keywords:** agile, aws, azure, docker, gcp, git, java, javascript, kubernetes, microservices, problem-solving, python, rest apis, scrum, sql
- **Matched:** azure, docker, javascript, kubernetes, microservices, problem-solving, python, rest apis, scrum, sql
- **Missing:** agile, aws, gcp, git, java

3. Skills Detected

- **Resume Skills:** python, r, sql, tableau

4. Skillsets Needed and Recommendations

- **Missing Skills:** agile, aws, gcp, git, java
 - **Recommendations:** The resume appears to lack cloud experience (AWS, Azure, GCP). To address this, complete a relevant cloud provider's introductory course (e.g., AWS Certified Cloud Practitioner) and build a personal project deploying an application to that cloud platform. Document this project prominently on the resume and GitHub.
